AI System Impact Assessment Guidance

AI Management Essentials: Integrating ISO 42001 & ISO 23894

Understanding the Foundations of the EU AI Act

Approaches to Establish Trust in AI Systems

Jun 13, 2026

Hector Nemoto, BSI
Global Training Director

Dinh Duc Nha Nguyen

has successfully completed the online Specialization

AI Governance & ISO 42001 Readiness for GRC, Audit, & Legal

Built by BSI, a founding member of ISO and a leading global certification body, this specialization introduces you to the foundations of responsible AI governance, covering core AI concepts, the AI system lifecycle, stakeholder impacts, and AI risk management aligned with international standards. You will develop practical understanding of AI impact assessments, AI risk management frameworks, and the purpose, structure, and benefits of ISO/IEC 42001, alongside regulatory and ethical considerations including the EU AI Act and trustworthy AI principles. By completion, you will be equipped to support organizational readiness for AI governance, ISO 42001 alignment, and effective AI management systems.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
